

Anish Kuila

Boston, MA | (617) 581-5833 | www.linkedin.com/in/anish-kuila | anishkuila006@gmail.com | kuila.a@northeastern.edu | US Citizen

SKILLS

Programming Languages: Java • C • C++ • Python • HTML • CSS • JavaScript • SQL

Frameworks: Node.js • Express.js • React • Java Swing • Spring • Spring Boot • Hibernate • Bootstrap • Material UI

Databases & Cloud: MySQL • MongoDB • AWS • Google Cloud Platform

Tools: Git • Github • Linux • REST APIs • PhpMyAdmin • Postman • Terraform • CI/CD • VS Code • Figma • Moqups

EDUCATION

Northeastern University, Boston, MA

Masters in Software Engineering Systems

Dec 2025

Relevant Courses: Object Oriented Design | Web Design | Program Structures and Algorithms | Enterprise Software Design | Network Structures and Cloud Computing | User Experience Design/Testing | Building Virtual Environments

R.V. College of Engineering, Bangalore, India

Bachelors in Computer Science Engineering

Aug 2022

Relevant Courses: Data Structures and its Applications | Design and Analysis of Algorithms | Database Design | Software Engineering | Operating Systems | Artificial Intelligence and Machine Learning | Mobile App Development

WORK EXPERIENCE

RVCE Centre of Excellence Internship Program | Intern

Sep 2021 - Oct 2021

CCTV Research: Detection And Recognition of Sign Board Readings in Highways

Engineered a computer vision solution for automated traffic signboard detection and recognition using CCTV data.

PROJECTS

DeliverEase - Food Ordering Mobile App

Jan 2025 - Apr 2025

- Designed a food-ordering app frontend using Figma and Moqups, focusing on usability and intuitive navigation.
- Built high-fidelity wireframes and interactive prototypes for onboarding, browsing, checkout, and order tracking.
- Applied core UI/UX principles to enhance usability, consistency, and accessibility across the app.

Medshop - Online Medical Store Platform

Oct 2024 - Dec 2024

- Created a robust system to manage medical inventory, customer orders, and stock requests using Spring MVC.
- Implemented secure session and transaction management with Hibernate for reliable database operations.
- Optimized database performance using HikariCP and deployed JSP views on Tomcat 9 via NetBeans.

Recipe Hub

Jan 2024 - May 2024

- Built a full-stack platform for recipe management, enhancing both culinary workflows and user experiences.
- Designed user-friendly interfaces using React, MaterialUI, and Bootstrap including role-based functionalities.
- Engineered RESTful APIs with Node.js, Express.js, and MongoDB, and validated endpoints using Postman.

Face Detection and Gender Identification using Convolutional Neural Network

Jan 2022 - Jul 2022

- Integrated Haar-cascade for face detection with CNN for accurate gender identification using Python.
- Trained the model on the CelebA dataset (2,400 images) by reducing layers to improve computational efficiency.
- Achieved 99.97% (male) and 94.18% (female) accuracy, with detailed analysis using OpenCV and Tensorflow.

Covidcare - Healthcare Service System

Jul 2019 - Feb 2020

- Developed a Django-based hospital web app for patient/doctor management, real-time appointments, and reports.
- Structured a scalable MySQL backend using PhpMyAdmin for efficient queries with a systematic approach.
